To anyone considering D. E Miller for a roofing project:

As a construction project manager on the campus of Hobart and William Smith Colleges I have had the opportunity to work with Denny Miller and his crew on over a dozen roofing projects. Our campus is an eclectic mix of building types- old and new, commercial and residential. Miller Roofing has performed excellently on all types.

Another strength of D. E. Miller Roofing is its stability and the consistency of its crew. Headed by Denny's son Jim, the crew with most of the same guys show up on each project.

Finally and most importantly Denny always answers the phone and is very responsive to any issues that may arise. With over twelve years partnering with D. E. Miller Roofing I feel qualified to heartily recommend Denny Miller for any roofing project.

Sincerely,

Tom Bonacci, Project Manager
Hobart and William Smith Colleges
